

Thales Felipe

Backend Developer | Python, Django, DRF, APIs

Florianópolis, SC, Brazil | Remote | thales.dev.flp@gmail.com | linkedin.com/in/thales-felippe | github.com/thalesfelippe | thalesdevflp.com

Professional Summary

Backend Developer / Full Stack Developer with experience in Python, Django, Django REST Framework, REST APIs, webhooks, relational databases, Redis/Celery, and critical integrations for product, fintech, and operational platforms.

Experience with payments, NFS-e, digital signatures, CRMs, asynchronous processing, analytical dashboards, traceability, operational security, and reliability of financial workflows.

Core Skills

Back-end: Python, Django, Django REST Framework, REST APIs, Webhooks, Node.js, Laravel

Data & processing: PostgreSQL, MySQL, Redis, Celery, Pandas, ApexCharts

Integrations: GalaxPay, Asaas, eNotas / NFS-e, DocuSign, RD Conversas, Z-API, Twilio, CRMs

Operations & cloud: Heroku, GCP, Docker, GitHub Actions, Logs, Monitoramento, POST/CSRF

Professional Experience

Full Stack Developer - Clube Fácil

Independent Contractor | Jan 2026 - Present | Rio de Janeiro, Brazil | Remote

- Working on a new evolution phase of the Clube Fácil Administrative Platform, focused on back-end, integrations, asynchronous processing, management dashboards, digital signatures, and reliability of financial workflows.
- Strengthened GalaxPay integrations for customers, cards, subscriptions, payments, webhooks, refunds, payment booklets, adjustments, cancellations, and reconciliation.
- Improved eNotas / NFS-e workflows and implemented DocuSign for fiscal invoicing, electronic signatures, webhooks, resend flows, and document downloads.
- Developed asynchronous routines with Celery and Redis on Heroku for financial synchronization, notifications, task processing, and data updates.
- Reworked dashboards with MRR, delinquency, churn, revenue, average ticket, margin, and sales/unit performance, along with governance, logs, and operational security improvements.

Full Stack Developer - Acrux Capital

Independent Contractor | Aug 2025 - May 2026 | Rio de Janeiro, Brazil | Remote

- Evolved from Front-End Developer to Full Stack Developer, taking on back-end, integrations, APIs, and observability across management applications and dashboards.
- Worked with React/TypeScript and Django/DRF, connecting business rules, operational data, and user experience.
- Rebuilt Saiu Acordo with a new front-end, UX/conversion improvements, component architecture, APIs, webhooks, asynchronous queues, and monitoring.

Front-End Developer - Acrux Capital

Independent Contractor | May 2023 - Aug 2025 | Rio de Janeiro, Brazil | Remote

- Developed React/TypeScript interfaces for financial products, management applications, and the Saiu Acordo platform.
- Implemented an operational chat integrated with Z-API, WhatsApp, Piperun/CRM, and WebSockets for real-time support.
- Refined negotiation flows, forms, and user journeys with a focus on clarity, friction reduction, conversion, performance, and accessibility.

Full Stack Developer - Clube Fácil

Independent Contractor | Dec 2024 - Sep 2025 | Rio de Janeiro, Brazil | Remote

- Evolved the administrative and financial system for contracts, payments, reports, check-in, external integrations, and internal user experience.
- Worked with GalaxPay, eNotas / NFS-e, and RD Conversas, supporting charges, invoices, webhooks, customer service, and contact tracking.
- Improved registrations, contracts, validations, migrated clients, search, operational logs, dashboards, and visual refinements.

Front-End Developer - Art Lab Desenvolvimento

Independent Contractor | Feb 2021 - Feb 2022 | Florianópolis, SC | On-site

- Built and maintained responsive institutional websites and web apps, working from layout to code in collaboration with design, management, and marketing teams.
- Featured project: Cimtia Ads, a TV media buying web app later sold to Record TV.
